

1115 FOOTHILL BEEF MINERAL HI-MAG

WARNING! DO NOT FEED TO SHEEP.

This feed contains added copper at levels that may be toxic to sheep.

CAUTION: Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

PRODUCT INFORMATION

FOOTHILL BEEF MINERAL HI-MAG is a complete free-choice mineral-vitamin mix designed specifically for situations where a calcium to phosphorus ratio of 2 to 1 is needed for optimum performance. FOOTHILL BEEF MINERAL HI-MAG contains a high level of magnesium. A portion of the magnesium is sequestered for improved biological availability. It is designed specifically for cattle on range, wheat pasture, or early spring grass, when grass tetany may be a problem.

FOOTHILL BEEF MINERAL HI-MAG contains calcium necessary for strong bone development, maximum milk production, and other body functions. Phosphorus, provided in FOOTHILL BEEF MINERAL HI-MAG, is necessary for optimum energy utilization, reproductive performance, and fiber digestion. FOOTHILL BEEF MINERAL HI-MAG also contains magnesium and a specially formulated blend of traced minerals including copper, zinc, manganese, selenium, cobalt, and iron. These minerals play vital roles in body metabolism and are necessary to build and maintain an active immune system, healthy tissues, and overall animal health. Several of these trace minerals play key roles in energy and protein metabolism and are essential to optimize efficiency and rate of gain. Vitamins A, D, and E, also included in FOOTHILL BEEF MINERAL HI-MAG, play key roles in the maintenance of optimum health, growth, and reproductive performance.

FEEDING DIRECTIONS

Self-feed FOOTHILL BEEF MINERAL HI-MAG as the only source of supplemental minerals and salt to mature cattle (grazing lush pastures) in a covered feeder at the rate of two (2) to four (4) ounces per head daily. Consumption may vary with quality of forage available. Average consumption should not exceed 4 oz per head per day so that the intake of selenium does not exceed the legal maximum of 3 mg per head per day. Provide a continuous supply of clean, fresh water. Monitor consumption by salt-starved or mineral-starved animals.

Net Weight: **50 Pounds (22.7 Kilograms)**
