PRODUCT INFORMATION

FOOTHILL ROUGHAGE CONVERTER MONEY SAVER is a complete free-choice mineral-vitamin mix formulated to aid in the prevention of nutritional deficiencies in cattle grazing high quality pastures or consuming other roughages. It is also used during periods when cattle are fed corn silage or limited amounts of grain.

FOOTHILL ROUGHAGE CONVERTER MONEY SAVER contains calcium necessary for strong bone development, maximum milk production, and other body functions. Phosphorus, provided in Foothill Roughage Converter Money Saver, is necessary for optimum energy utilization, reproductive performance, and fiber digestion. Foothill Roughage Converter Money Saver also contains magnesium and a specially formulated blend of traced minerals including copper, zinc, manganese, selenium, cobalt, and iron. These minerals play vital roles in body metabolism and are necessary to build and maintain an active immune system, healthy tissues, and overall animal health. Several of these trace minerals play key roles in energy and protein metabolism and are essential to optimize efficiency and rate of gain. Vitamins A, D, and E, also included in Foothill Roughage Converter Money Saver, play key roles in the maintenance of optimum health, growth, and reproductive performance.

FEEDING DIRECTIONS

Self-feed Foothill Roughage Converter Money Saver as the only source of supplemental minerals and salt to mature cattle (grazing grass pastures or fed grass hay) in a covered feeder at the rate of 2 to 3.6 ounces per head daily. Consumption may vary with quality of forage available. Average consumption should not exceed 3.6 oz per head per day so that the intake of selenium does not exceed the legal maximum of 3 mg per head per day. Provide a continuous supply of clean, fresh water. Monitor consumption by salt-starved or mineral-starved animals.

Net Weight: **50 Pounds (22.7 Kilograms)**
