

## MS KID MILK REPLACER

**MS KID MILK REPLACER** will provide all the nutrients necessary for optimal growth of kid goats from its second day of life through weaning when fed as directed

### FEATURES AND BENEFITS

- ☞ A 23% protein, 25% fat, milk replacer
- ☞ Contains emulsified fats and oils for optimum fat digestibility
- ☞ Contains all milk protein sources
- ☞ Highly palatable and economical to feed
- ☞ Acidified for use in Cold Ad-Libitum feeding systems. Acidification improves kid performance and reduces the incidence of scours.

### FEEDING INSTRUCTIONS

For the first few days of the kid's life, it should be fed a warm restricted feeding program:

Feed a limited quantity (maximum 1 pint) per feeding up to 3 – 4 times per day. Best results are achieved feeding milk warm (98°F)

**Cold Ad Lib Feeding:** This method works well for raising larger groups of kids that have been removed from the mother soon after birth. It is the recommended system when a number of kids are being taken away, as with a milking herd.

SEE LABEL FOR MIXING DIRECTIONS FOR BOTH FEEDING SYSTEMS.

At three to seven days of age, begin offering **FARMERS BEST CALF STARTER 18%** free-choice.
