

BATTLE ROYALE BEEF MIX

M E D I C A T E D

For Growing Cattle

WARNING! DO NOT FEED TO SHEEP. This feed contains added copper at levels that may be toxic to sheep.

CAUTION: Do not allow horses or other equines access to feed containing Monensin. **Ingestion of Monensin by equines has been fatal.** Monensin-medicated cattle and goat feeds are safe for use in cattle and goats only. Consumption by unapproved species may result in toxic reactions. If feed refusals containing Monensin are feed to other groups of cattle, the concentration of Monensin in the refusals and amount of refusals fed should be taken into consideration to prevent Monensin overdosing.

FOR INCREASED RATE OF WEIGHT GAIN (For growing cattle): Mix in total ration so as to supply 3.6 to 14.3 lbs. of this feed per head per day, thereby supplying 50 - 200 mg monensin per head daily. During first 5 days, cattle should receive no more than 100 mg monensin per day (7.2 lbs. of this feed).

WARNING: A withdrawal time has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.

This feed contains an insect growth regulator, which prevents the development of house, stable, face and horn flies in the manure of treated beef and dairy cattle. Feed this product to beef or dairy cattle for continuous feeding during the fly season at a rate of 2.2 lbs. per one hundred pounds of body weight per day to provide 4.54 mg Diflubenzuron per one hundred pounds of body weight per day (0.10 mg/kg of body weight/day).

Feed this product to cattle according to your nutritionist's directions. For selenium purposes, this product should not exceed 73.2% of total ration.

REMINDER: Feed is perishable. Store this product in a cool, dry area away from insects. DO NOT feed moldy or insect-infested feed.
